

Employment Opportunity

The Argyle International Airport (AIA) Inc. with its registered office and operations within the state of Saint Vincent and the Grenadines invites applications from suitably qualified persons for the position of **Assistant Engineer- Electrical Maintenance**.

Background:

The AIA Inc. is charged with the responsibility of managing the Argyle International Airport along with airports in Bequia, Canouan and Union Island.

Role:

The Assistant Engineer-Electrical Maintenance will assist the Engineer-Electrical Maintenance in coordinating, developing and managing all aspects of the electrical and electronic works including the design, installation and maintenance of all buildings, plant, equipment, fixtures, fittings and personnel assigned to the Unit.

Reports to:

Engineer-Electrical Maintenance

Responsibilities:

The Assistant Engineer-Electrical Maintenance is responsible for:

1. Assisting the Engineer-Electrical Maintenance in developing effective preventative and corrective maintenance programmes and overseeing the implementation of such with the objective prolonging the useful life of the Company's plant and equipment and ensuring their performance to regulated and accepted standards.
2. Supporting the development of systems and programmes to control and measure quality in the Electrical Maintenance Department and for ensuring that the standards for service, equipment and performance are maintained.
3. Supervising and providing feedback on the implementation of the maintenance programmes, with the objective of prolonging the useful life of the Company's Electrical Works and ensuring performance to industry standards.
4. Assisting in forecasting departmental operating costs and monitoring departmental performance in the area of Electrical Maintenance.
5. Assisting with the acquisition of equipment, materials and services in accordance with the planned annual programme and budget.

6. Exploring and identifying opportunities for improvement in organizational performance.

Required Qualifications and Experience:

- a) A degree in Electrical and/or Electronic Engineering.
- b) A valid driver's license with at least 3 years of experience
- c) Being a member of a recognized institute of Electrical and/or Electronic Engineering and having sound knowledge of the relevant International Civil Aviation Organisation standards would be an asset.

Remuneration: To be negotiated

Applications should be addressed to: The Chairman, AIA Inc. P. O. Box 2312, Kingstown, St. Vincent and the Grenadines or emailed to: godfredpompey@gmail.com

Applications to be received not later than 22nd December, 2023
